★ Our Nation's History ★

This is the Dome of the United States Capitol building in Washington, D.C. The part of the building just under the Statue of Freedom near the top is what architects call the "tholos," and if the light in the Capitol's tholos is lit at night, that means that one or both of the U.S. Senate and the House of Representatives are in session. This tradition is believed to have begun in the 1800's when many members of Congress lived in area boarding houses and they needed to know when to convene!

Library of Congress, Prints and Photographs Division.

✦Wonders of the World✦

Mauna Loa and Kilauea volcanoes in Hawaii are known for heat – especially for Kilauea's spectacular lava flows into the Blue Pacific. But Mauna Loa also rises nearly 14,000 feet above its ocean shore, high enough to get some snow every year, and sometimes a lot of snow. Last December, several feet fell on the highest mountains in Hawaii, and just last month in March there was a blizzard warning! This snowboarder is getting some air within sight of the world's largest astronomical observatory atop Mauna Kea, a dormant volcano and the tallest of the Hawaiian mountains.
